

MULTI-ANGLE™ ADJUSTABLE SQUARE

BORA™

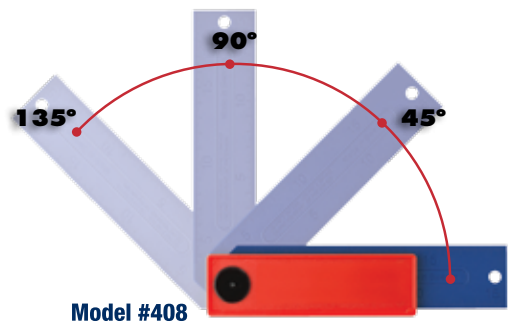

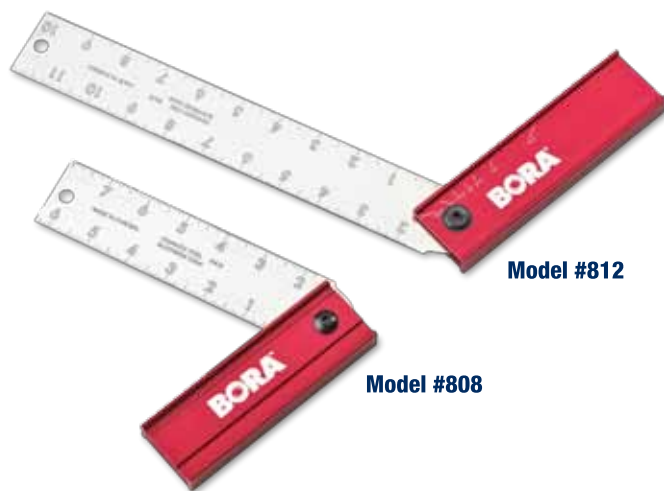

MULTI-ANGLE™ ADJUSTABLE SQUARE

Precise, Durable Accuracy

The new Bora Multi-Angle™ Adjustable Square will help you take the guess work out of the layouts of complex angles. Precise pre-set locking positions allow for consistent measurements from project to project.

Constructed of durable materials with an extruded aluminum base and etched stainless steel ruler (Model #408 constructed from tough composite poly materials). This folding square is available in three different sizes, has eight locking positions (Model #408 has four positions), is easy to open and close, and will fit perfectly in carpenter's belts or pockets.

- Precise accuracy within +/- .05° tested to 50,000 completed folding cycles.
- Collapsible design allows for ease of use and multiple storage options.
- Consistent measurements with 8 pre-set positions on Models #808 and #812 (4 on Model #408).
- Engineered for everyday use by the professional/contractor.
- Made in Sweden. Lifetime Warranty.

STOCK NO.	MODEL #	ITEM	PRE-SET ANGLES
